New Delhi, India • +91 87007 51399 • parthalagh05@gmail.com • [linkedin.com/in/parth-alagh-170606297](https://www.linkedin.com/in/parth-alagh-170606297) • [github.com/notparthh0](https://github.com/notparthh0)

## PROFESSIONAL SUMMARY

Results-oriented Data Engineer and Analytics Engineer with strong foundations in cloud infrastructure (GCP) and distributed data processing. Expertise in designing scalable ETL/ELT pipelines, optimizing SQL queries for high-volume datasets, and bridging the gap between raw data and actionable business intelligence in Agile environments. Passionate about data reliability, automation, and driving digital transformation through robust data architectures.

## EDUCATION

### University School of Information, Communication and Technology (USICT)

New Delhi, India

B.Tech in Information Technology | CGPA: 8.45/10.0

Expected 2027

- Relevant Coursework: Database Management Systems, Data Structures & Algorithms, Statistical Analysis, Operating Systems
- Achievement: Ranked in Top 1% nationwide in CBSE Class XII (93.4%)

## TECHNICAL SKILLS

**Languages:** Python (Pandas, NumPy, PySpark), SQL (Advanced), Bash/Shell Scripting

**Data Engineering:** ETL/ELT Pipelines, Data Modeling (Star/Snowflake Schema), Batch Processing, Data Warehousing, Query Optimization, Idempotent Pipelines

**Cloud & Big Data:** Google Cloud Platform (BigQuery, Cloud Storage, Dataflow), Apache Spark

**Databases:** PostgreSQL, MySQL, BigQuery

**Analytics & BI:** Power BI (DAX, Data Modeling), Excel (Power Query, VBA Automation)

**Tools & Methodologies:** Git, GitHub, VS Code, Jupyter Notebooks, REST APIs, JIRA, Agile/Scrum, CI/CD pipelines

## EXPERIENCE

### Project Intern – Agentic AI | [IBM SkillsBuild](#) / [CSRBOX](#)

July 2025 – Aug 2025

- Architected and deployed autonomous AI agents, transitioning from theoretical concepts to functional, modular solutions using Python.
- Engineered scalable AI workflows and integrated LLM APIs, reducing manual task execution dependencies.
- Collaborated in an Agile team to prototype agentic systems capable of executing complex, multi-step tasks with high reliability.

## KEY PROJECTS

### End-to-End Serverless Cloud Data Pipeline (GCP) | *Python, SQL, GCP (GCS, BigQuery)*

- Architected a scalable pipeline ingesting raw logs into Google Cloud Storage and loading transformed data into BigQuery.
- Implemented Python transformations to parse JSON and enforce schema consistency before Data Warehouse loading.
- Designed a Star Schema in BigQuery with partition and cluster strategies, reducing query costs by ~30%.
- Connected Power BI via DirectQuery for near real-time visualization of 100k+ records.

### Modern Data Stack Analytics Layer | *Advanced SQL, Data Modeling*

- Engineered an analytics layer transforming raw, semi-structured transactional data into clean Fact and Dimension tables.
- Utilized CTEs, Window Functions, and complex Joins to calculate rolling averages and YoY growth metrics.
- Optimized table indexing strategies to support high-performance querying for downstream BI dashboards.

### Corporate Revenue Intelligence System | *Power BI, DAX, MySQL*

- Engineered a Kimball Star Schema data warehouse in SQL, generating and modeling 24 months of synthetic B2B SaaS transaction data.
- Built a Power BI dashboard tracking ARR and CAC, using advanced DAX (CROSSFILTER, USERELATIONSHIP) to manage complex role-playing dimensions.
- Conducted cohort analysis uncovering a 15% regional revenue deficit, identifying actionable churn-reduction strategies to recover \$1.2M in ARR.

## CERTIFICATIONS

- IBM Data Engineering Professional Certificate (Coursera)
- Google Cloud Certification: Cloud Data Engineer – Coursework Completed
- Applied Data Science with Python – University of Michigan
- Machine Learning – DeepLearning.AI
- Microsoft Power BI Data Analyst
