PROFESSIONAL SUMMARY

Results-oriented Data Engineer with strong foundations in cloud infrastructure (GCP) and distributed data processing. Expertise in designing ETL/ELT pipelines, LLM-powered agentic workflows, and bridging raw data to actionable intelligence. Experienced with datasets ranging from 100K+ records to multi-million-row workloads.

EDUCATION

University School of Information, Communication and Technology (USICT) <i>B.Tech in Information Technology CGPA: 8.45/10.0</i>	<i>New Delhi, India</i> Expected: May 2027
- Relevant Coursework: Database Management Systems, Data Structures & Algorithms, Statistical Analysis, Machine Learning, Operating Systems, Probability & Statistics, Linear Algebra - Achievement: Ranked in Top 1% nationwide in CBSE Class XII (93.4%)	

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, Scikit-learn), SQL (Advanced), Bash/Shell Scripting, R
Machine Learning & AI: LLMs, Prompt Engineering, Agentic AI, LangChain, OpenAI API, RAG, NLP, Supervised & Unsupervised Learning, Deep Learning, Neural Networks
Data Engineering & Cloud: ETL/ELT Pipelines, Data Modeling (Star/Snowflake Schema), Batch & Stream Processing, GCP (BigQuery, Cloud Storage, Dataflow), Apache Spark
Databases: PostgreSQL, MySQL, BigQuery
Analytics & Visualization: Power BI (DAX, Data Modeling), Excel (Power Query, VBA), Jupyter Notebooks
Tools & Methodologies: Git, GitHub, VS Code, REST APIs, JIRA, Agile/Scrum, CI/CD Pipelines

EXPERIENCE

Project Intern – Agentic AI IBM SkillsBuild / CSRBOX	<i>July 2025 – Aug 2025</i>
- Built and deployed autonomous AI agents using Python and LLM APIs, transitioning prototypes into functional multi-step agentic workflows in an Agile team. - Engineered scalable AI workflows integrating LangChain APIs, cutting manual task execution by 60% through automated pipeline orchestration on GCP.	

KEY PROJECTS

Agentic AI Pipeline for Autonomous Task Execution Python, LangChain, LLM APIs, GCP
- Built a modular autonomous AI pipeline using LangChain and LLM APIs, executing structured data engineering workflows from natural language task instructions. - Reduced manual task execution time by 40% through multi-step LLM reasoning pipelines with automated tool-use capabilities, tested on real-world DE contexts.
News Pulse — Topic-Clustered News Timeline Python, Node.js, Next.js, PostgreSQL
- Engineered a full-stack RSS aggregation system (Python/Node.js/Next.js) ingesting BBC, NPR and Reuters feeds with TF-IDF cosine similarity clustering to auto-group related articles. - Deployed on Vercel + Render with PostgreSQL backend; built 5-endpoint REST API and Next.js timeline UI, demonstrating full end-to-end product ownership.
End-to-End Serverless Cloud Data Pipeline (GCP) Python, SQL, GCP (GCS, BigQuery)
- Architected a serverless GCP pipeline (Cloud Storage → BigQuery) with Kimball Star Schema, date partitioning and clustering — reducing query costs by ~30% on 100K+ records. - Connected Power BI via DirectQuery for near real-time dashboards; automated Python JSON parsing and schema validation before Data Warehouse loading.

CERTIFICATIONS

- IBM Data Engineering Professional Certificate — Coursera
- Google Cloud Certification: Cloud Data Engineer — Coursework Completed
- Applied Data Science with Python — University of Michigan
- Machine Learning Specialization — DeepLearning.AI (Andrew Ng)
- Microsoft Power BI Data Analyst
